Re: ikea whirlpool dwh b10 4 flashes
Usually very simple...look in the sump at about the 3 o'clock position, you will see a grid which is probably clogged up. Clean it thoroughly with hot water and a toothbrush...don't poke anything sharp through as there is a rubber diaphragm behind which you might puncture.

I have a Whirlpool DWF B10 built in dish washer bought from IKEA. Its just over a year old, and has stopped working. It worked ok for about 11 months, and then one day all we got was continous bleeping midway through a cycle and it stopped working. As it was still under waranty the nice man came out to take a look.
