The Biodome Garden Book : Patricia Watters : 9781463757014

With over a hundred black and white photographs, as well as detailed diagrams, THE BIODOME GARDEN BOOK describes how to construct and maintain a unique, self-contained, passive solar greenhouse and aquaculture unit that needs no electrical ventilation or humidifying system.

The biodome garden book (Book, 2011) [WorldCat.org]

The Biodome design discussed in the book is basically building the top of a concrete and fiberglass silo on the ground, with a 900 gallon fish tank in the center. The walls of the Biodome which also serve as the walls of the raised bed and the walls of the fish tank are made of concrete silo staves which have a cable with tension that runs around the outside of these staves to secure them.

Amazon.com: Customer reviews: The Biodome Garden Book: The ...

THE BIODOME GARDEN BOOK includes many varieties of wall structure concrete products that can be used effectively. STORAGE MASS: The water in the 800-gallon fish tank of the Biodome Garden is the primary thermal storage area, employing an effective thermal storage medium. This quantity of water will absorb, and then release, the heat equivalent of 37 gallons of oil over a 150-day heating season.
